# Image Editing Steps in Adobe Photoshop

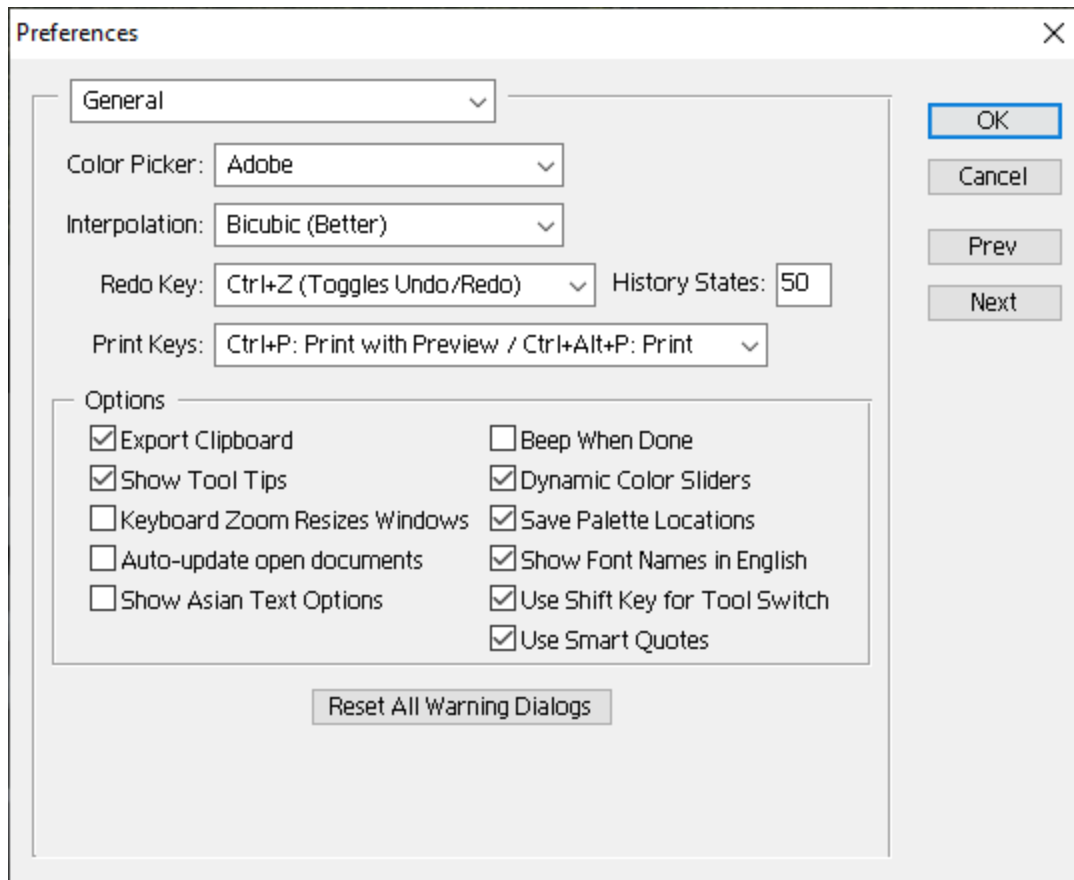

## Opening the File

1. Open Adobe Photoshop.
2. Load the file "HISTORY.TIF" into the workspace.

## Adjusting History State

3. Change the history state by navigating to Edit > Preferences > General.
4. Set the History state to 50.

### Configuring History Options

5. Open the History palette.
6. Choose History Options and enable "Allow non-linear history."

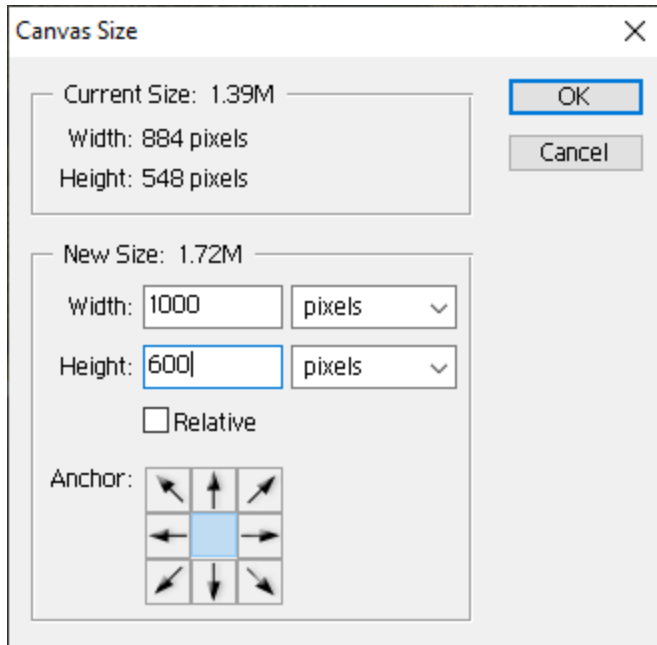

### Modifying Foreground/Background Colors

7. Set white as the foreground color and black as the background color.

### Changing Canvas Size

8. Choose Image > Canvas Size.
9. Change units to pixels and set the size to 1000 pixels by 600 pixels.

### Creating Rectangle Pattern

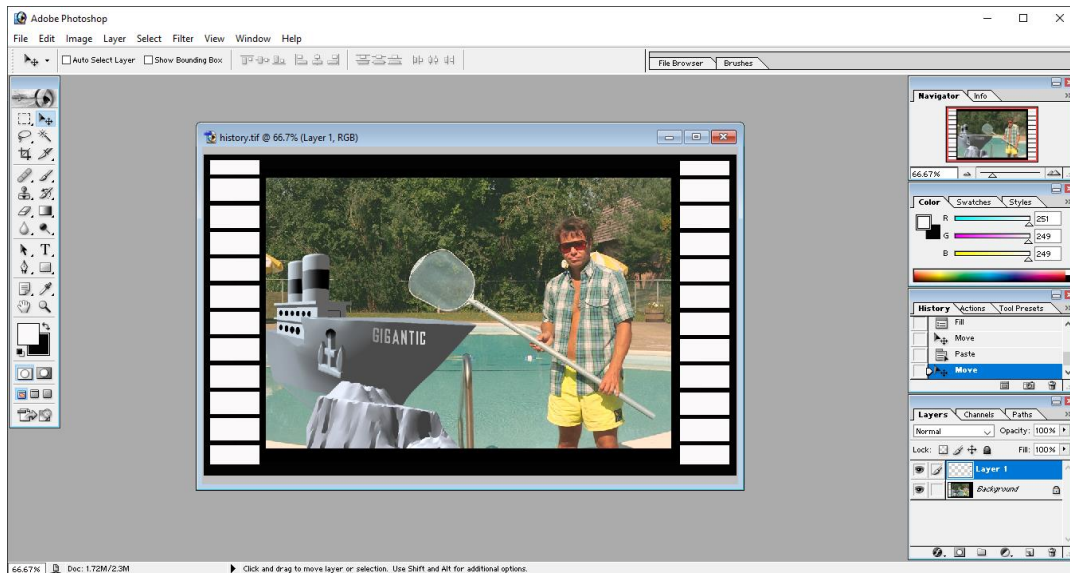

10. Use the Rectangular Marquee tool to create a small rectangular sprocket hole in the upper-left.
11. Fill the selection with white using Edit > Fill > Foreground Color.

### Defining and Filling Pattern

12. Deselect the selection.
13. Draw a selection border around the white rectangle, including some black border.
14. Choose Edit > Define Pattern and save it with a name.
15. Use Rectangular Marquee to select the left black border.
16. Fill the selection with the saved pattern using Edit > Fill > Pattern.

### Duplicating Pattern

17. Duplicate the pattern to the right side using the Move tool.

## Creating Snapshot

18. In the History palette, click the "Create New Snapshot" button to create a snapshot.

## Reverting in History

19. Click on the "Canvas Size" entry in the History palette to go back in history.

## Creating Star Pattern

20. Use the Type tool with Zapf Dingbats, Regular, 60 pt, and white color.
21. Type "H" and use the Move tool to position the star properly.

## Rasterizing and Flattening

22. Keep the Type layer selected and choose Layer > Rasterize > Type.
23. Flatten the image using Layer > Flatten Image to convert it to a single layer.

## Deleting Unnecessary History Entries

24. To avoid exceeding 50 History steps, delete unnecessary entries like Deselect and Rectangular Marquee by dragging to the trash icon. Return to the last entry (Flatten).

## Defining, Filling, and Duplicating Star Pattern

25. Using Rectangular Marquee, define, fill, and duplicate the star pattern as done before for the rectangular pattern.

### **Saving the File**

26. Save the file as "TASK8.PSD."
27. Additionally, save it as "TASK8.JPG" for a different format.
