## **Simulating Cloud Movement in Flash Document**

### **Step 1: Launching Flash Document**

Navigate to the Start menu.  
Access Macromedia and click on "Flash Document."

### **Step 2: Creating a Background**

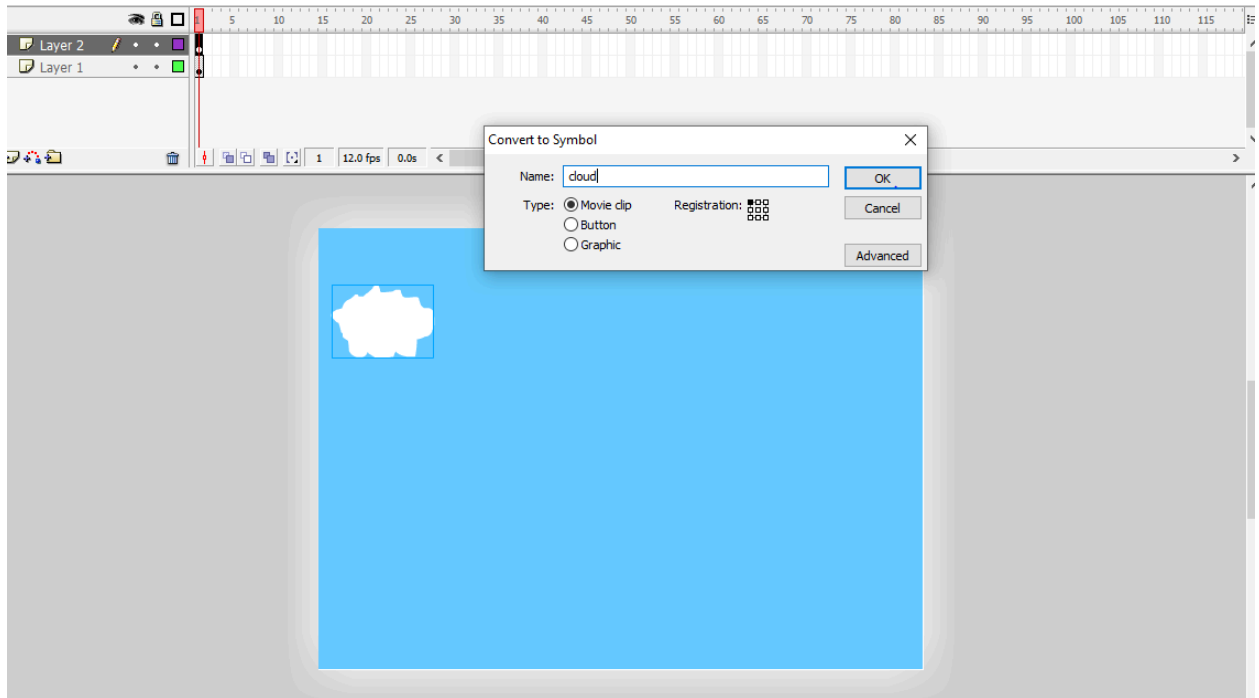

In Layer 1, create a blue background.

### **Step 3: Drawing Clouds**

Insert Layer 2.  
Select the Pencil option from the toolbar.  
Draw clouds in Layer 2.

### **Step 4: Coloring the Clouds**

Right-click on the drawn cloud.  
Choose "Convert to Symbol."  
Name it as "cloud" and select the Movie Clip option. Click OK.

## Step 5: Applying Glow Effect

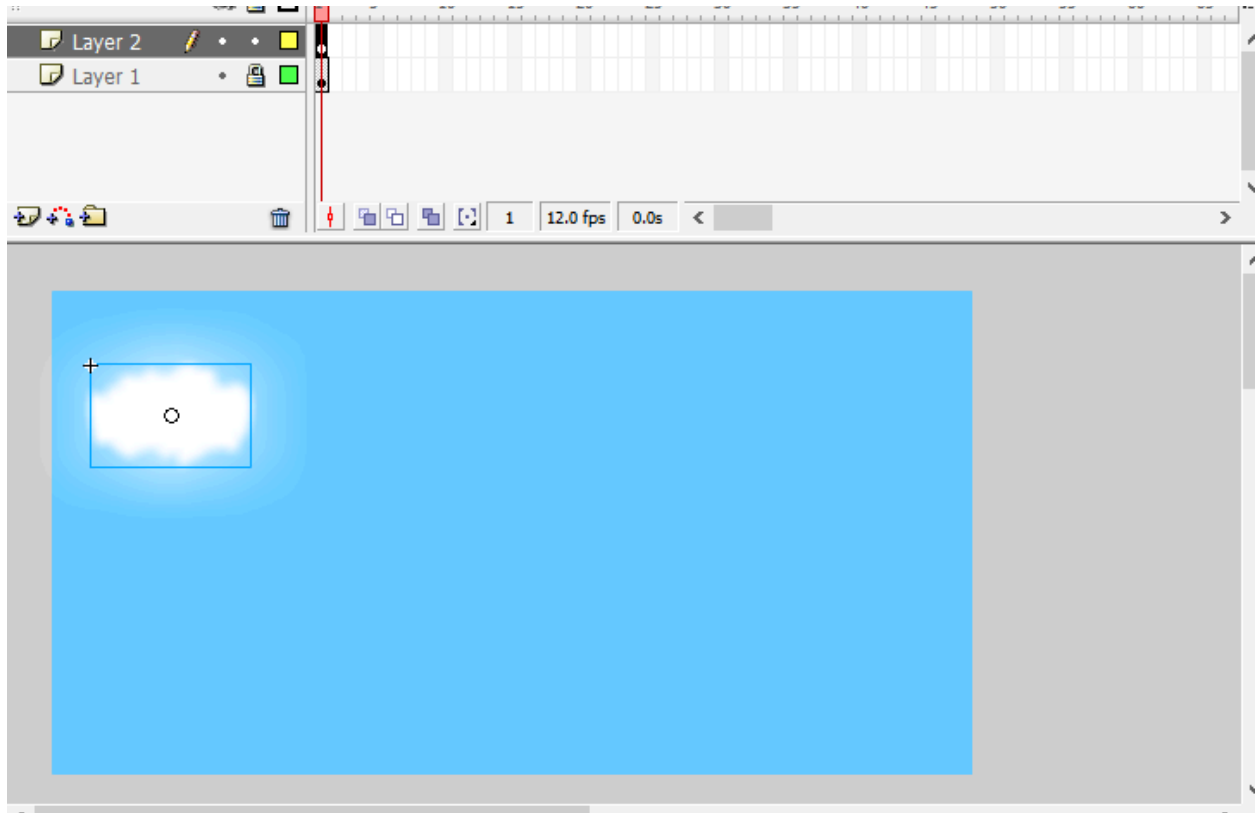

Go to Filter.

Click on the "+" symbol.

Choose "Glow" to apply a glowing effect.

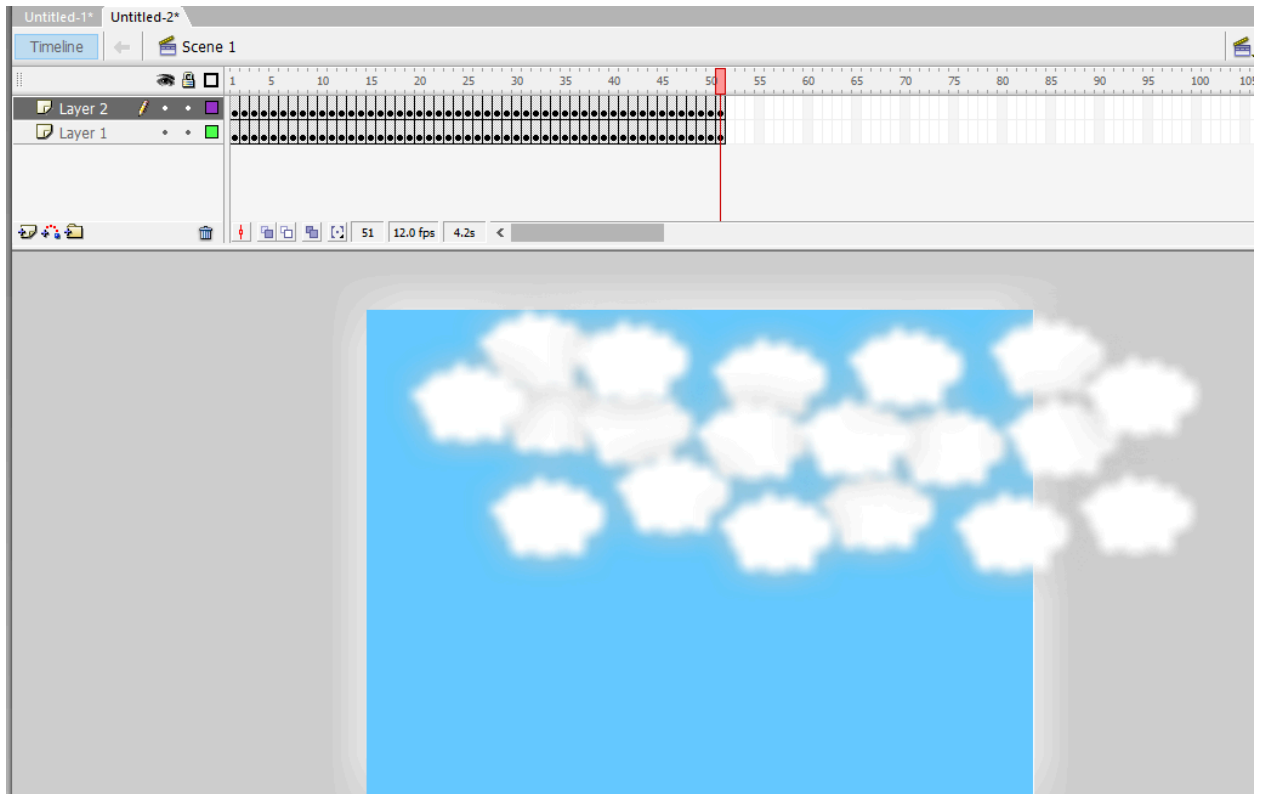

Select the color as white.

Adjust the blur X and blur Y values for an appropriate glow effect.

## Step 6: Adding Motion

Go to the frames and insert a keyframe on both layers.  
Create a motion tween on the 2nd layer to move the clouds.

## Step 7: Testing the Movie

Finally, go to Control.

Click on "Test Movie" to simulate and preview the movement of the clouds.
