Image Editing Steps in Adobe Photoshop

Opening the Files

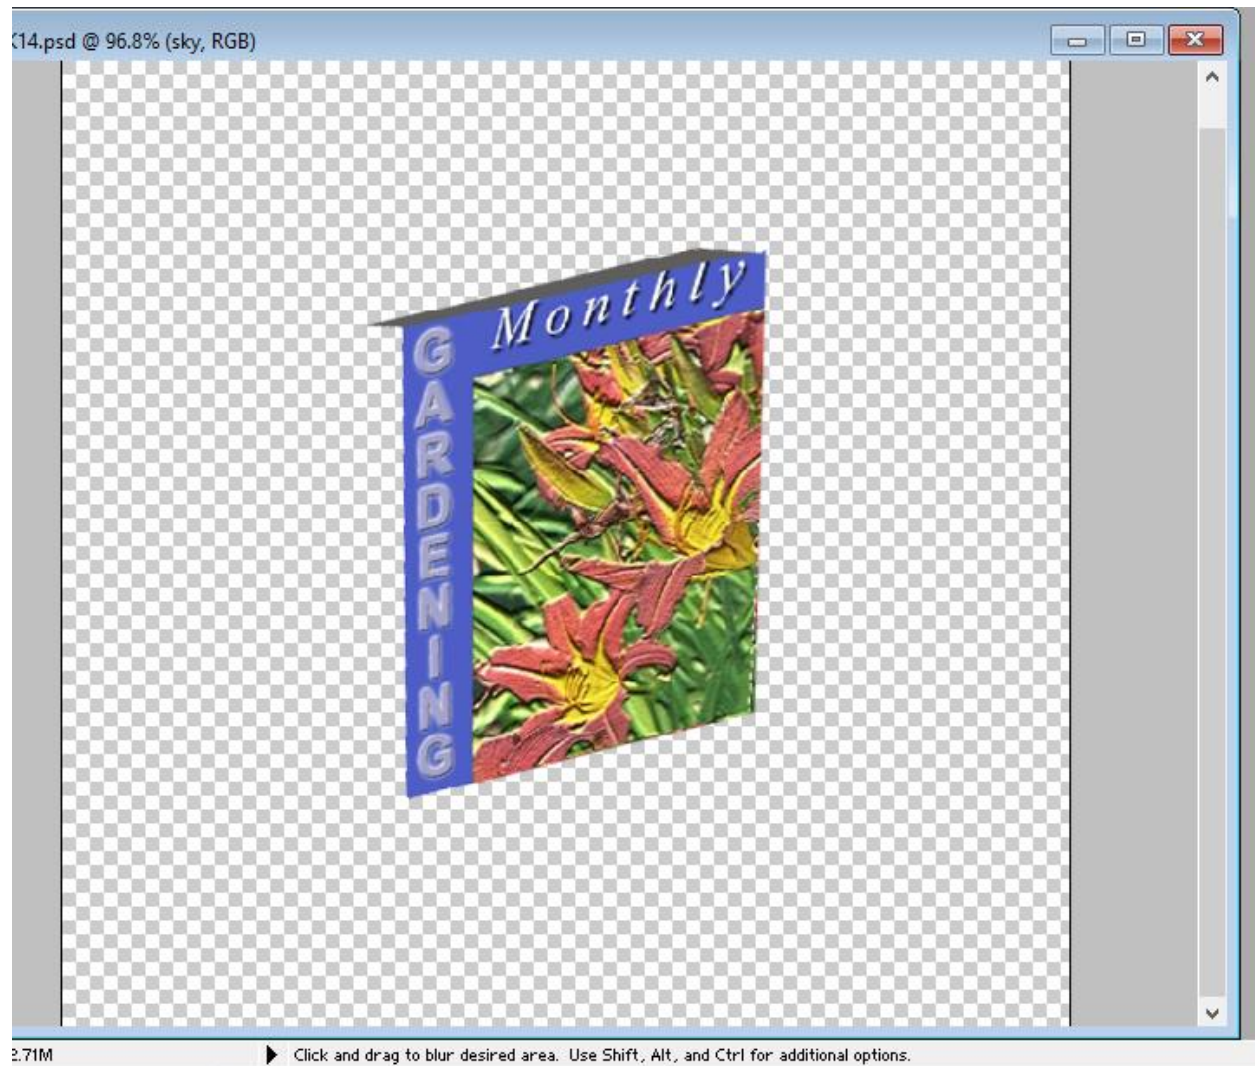

1. Open Adobe Photoshop.
2. Load the file "Gardening.TIF" into the workspace.

Applying 3D Transform

3. Choose Filter > Render > 3D Transform.
4. Use the Cube tool to drag from the upper-left to the lower-right of the image.
5. Use the Direct Selection tool to modify the wireframe's shape.
6. Position the wireframe using the Selection tool, ensuring the right face encloses the image.
7. If needed, use the DEL key to delete the wireframe and start over.
8. Use the Trackball tool to rotate the shape, making the left, top, and front faces visible.
9. Apply the 3D Transform by choosing Filter > Render > 3D Transform > Pan Camera. Drag the shape to the left for a clear view and click OK.

Creating Layer Copy

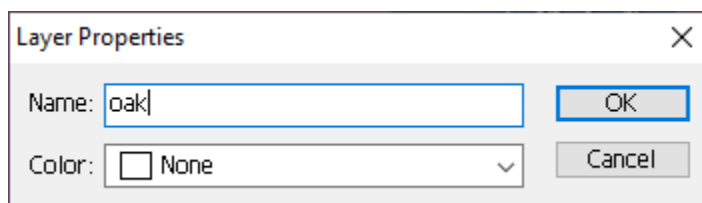

10. Use the Polygonal Lasso (PL) to select edges of the 3D box.
11. Create a new layer copy and name it "Gardening."

12. Switch off the Background layer.

Incorporating Another Image

13. Open the file "OAK.TIF" in Photoshop.

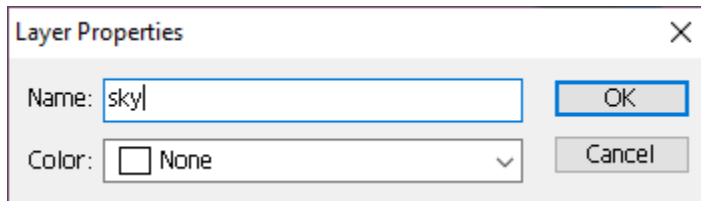

14. Create a layer copy of its content.
15. Paste the content into the "Gardening.TIF" file.
16. Name the new layer "oak" and position it below the "Gardening" layer.

Transforming Oak Image

17. Choose Edit > Transform > Distort to make the oak image resemble a table top supporting the cereal box.

Creating Sky Layer

18. Create a new layer named "sky" and position it below the "oak" layer.

19. Set the background color to the sky layer and fill it with the background color.

Adding Morning Sun Gradient

20. Set "o" as the foreground color.
21. Choose the Foreground to Transparent gradient with Radial Gradient mode.
22. Drag to create a yellow circle, simulating the morning sun.

Saving the File

23. Save the file as "TASK14.PSD."
24. Additionally, save it as "TASK14.JPG" for a different format.
