Documentation for Image Editing in Adobe Photoshop CS

Step 1: Opening the File

Open Adobe Photoshop CS.
Navigate to the workspace.
Open the provided file, "boat.psd," in the workspace.

Step 2: Cropping and Alignment

Utilize the Crop Tool to remove the black border.
Align the image in the desired position and shape.

Step 3: Adjusting Levels

Access the Levels option to enhance contrast and brightness.

Step 4: Tarpaulin Color Adjustment

Zoom into the image.
Use the Rectangular Marquee tool to draw around the tarpaulin.
Utilize the "Replace Color" option.
Use the Eyedropper and Eyedropper+ to change the color of the tarpaulin to green.

Step 5: Blending Colors

Employ the Sponge Tool to blend colors seamlessly.

Step 6: Selecting Sky Parts

Use the Magic Wand tool to select all parts of the sky.

Step 7: Working with Cloud Overlay

Open the file "cloud.psd."
Select the entire picture in "cloud.psd."
Return to the "boat.psd" file.

Step 8: Pasting Cloud Overlay

Paste the previously selected cloud into "boat.psd."
Reposition the sky if necessary.

Step 9: Saving the File

Save the modified file, ensuring all edits are preserved.
